Facebook's Contact Tracing Toolkit

STRATEGIES AND SUPPORT TO STRENGTHEN
STATE PUBLIC HEALTH PROGRAMS

about.fb.com/coronavirus/

FACEBOOK

Overview

At Facebook, we're working to keep people safe and informed about coronavirus (COVID-19). That's a goal we share with governments, NGOs, philanthropies and companies across the United States.

One important strategy for stemming the spread of the virus and helping communities, states, and businesses safely open is contact tracing*: Community health workers identify and communicate with people who are infected and those they came in contact with. Operating these programs at scale requires tremendous effort from state governments, including informing communities, hiring community health workers, deploying effective messaging, and developing infrastructure, training and resources.

The Community COVID Coalition—CDC Foundation, National Governors Association (NGA), and the Association of State & Territorial Health Officials (ASTHO)—is designed to support governments in this effort. As a member, Facebook created this toolkit of resources, best practices, and step-by-step guides for how you can use Facebook to inform and recruit in your communities.

With this toolkit, we hope to empower people closest to the challenges posed by COVID-19, and together, make our communities healthier and safer.

Read more about [Facebook's COVID-19 efforts](#).

For additional information about what other tools and support you may be eligible to receive through the Community COVID Coalition, please contact [CDC Foundation](#).

* Case Investigation and Contact Tracing : Part of a Multipronged Approach to Fight the COVID-19 Pandemic. (2020, April 20), from <https://www.cdc.gov/coronavirus/2019-ncov/php/principles-contact-tracing.html>

The Toolkit

Every community and its government has different needs. This toolkit contains a number of resources to choose from to support you in launching and operating contact tracing programs.
